

BRETONIAN EXPANSION MOD - EDGE SYSTEMS

MAP ARCHIVE: PAGE FOUR

SARDINIA:

LEDGEND:

- Tradelane
- - - - - Line of Navigation Bouys
- ⊕ Station / Solar
- ⊗ Jumphole
- ➡ Jumpgate

SARDINIA INFOCARD:

Produces:

Boron
Diamonds

Imports:

H-fuel
Engine Components

Corporations:

None

Criminals:

Corsairs
Red Hessians

Nebula guidelines:

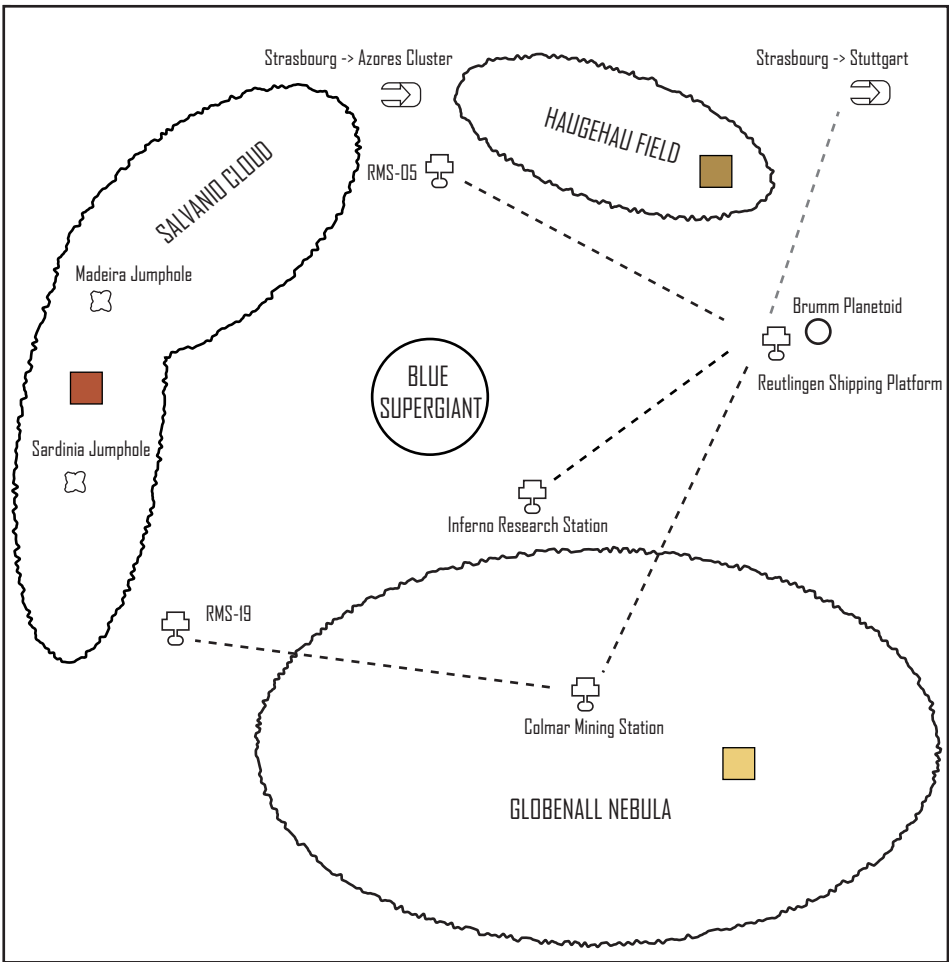

Nuoro Drift: Long, thin field of useless rocks and hydro-carbon ash. Covered with mines.

Asinara Cloud: White ice, blue floating specks, and clearish mist. Tau37 ice model.

The Desertas: Ice asteroids, blue vapour field. Stretches across the western half of the system. This is the lower end of the Barrier ice nebula.

NO RADIATION DANGER IN OPEN SPACE.

STRASBOURG:

STRASBOURG INFOCARD:

Produces:

Boron
Cobalt
Copper
H-fuel
Silver
Gold

Imports:

Engine Components
Mining Machinery
Construction Equipment
Optronics
Niobium

Corporations:

Kruger
IMG
Zoners
Republican Shipping

Criminals:

Red Hessians

Nebula guidelines:

Salvano Cloud: Radiation nebula, Westerwald style. Small rocks and clusters of larger asteroids.

Haugehau Field: Copper asteroids, clear field.

Globenall Nebula: Richest source of Gold, Silver, Cobalt and Boron found outside Dublin and Colorado. Sulfur field, small asteroids and large fragments. Contains a planetoid in first satges of breakup.

RADIATION DANGER NEAR BLUE SUPERGIANT STAR. INFERNO STATION PROVIDES SOME COVER. SALVANO CLOUD ALSO HAS MILD RADIATION.
