1. Description

Teplice is a planetary anomaly, in such a close orbit to its sun that its surface has been turned to ash. Bretonian astronomers believe it will fall into its sun within the next few millennia.

2. Stats

- DIAMETER: ... km
- MASS: ... $\times 10^{24}$ kg
- TERRAIN: ...
- TEMPERATURE: ... °C to ... °C
- ESCAPE VELOCITY: ... km/sec
- SYSTEM: [Far Point](#)
