1. Description

Geological scans of this planet have been hampered by the surrounding radiation belt and the planet's strong magnetic field. Survey teams have yet to be sent to the surface for direct assessment of mineral resources.

2. Stats

- DIAMETER: 3224.4 km
- MASS: 8.263×10^{24} kg
- TERRAIN: arid
- TEMPERATURE: -100°C to -25°C
- ESCAPE VELOCITY: 2.85 km/sec
- SYSTEM: [Nephele](#)
