1. Description

The <u>Gas Mining Guild</u> (<u>GMG</u>) ?rst surveyed the <u>Sigma-19</u> system in 550 AS and determined that it was rich in resources -- though far distant from the <u>GMG</u>'s usual markets. After intense negotiations, the <u>GMG</u> signed an agreement with <u>Kishiro</u> to ?nance a Jump Gate to the system in exchange for mining rights. Once the Jump Gate was opened in 650 AS, the Gas <u>Miner</u> Ogashawa was stationed in the system by the <u>GMG</u> and began full-scale operations. The fact that several <u>Kishiro</u> expert advisors are permanently assigned to the ship and that the Ogashawa provides support for <u>Kishiro</u>'s own mining activities in the system has reportedly not been well received by its corporate rival, <u>Samura</u>.
