1. Description

Isime is a moon of [planet Meitkin](#). It seems to be terraformed, but the results of terraforming do not appeared used at all. Probably it was a terraforming experiment or failed attempt, or abandoned since the catastrophe that happened to Meitkin. Still, Isime is habitable and appears to have small building clusters on its surface, but it features no landing facilities.

2. Stats

- DIAMETER: 1847.2 km
- MASS: 1.742 x10e24 kg
- TERRAIN: volcanic
- TEMPERATURE: -47°C/87°C
- ESCAPE VELOCITY: 5.17 km/sec
- SYSTEM: [Banysia](#)
