

Planet Toltsris

Location: [Mepther](#)

- Diameter: 3291.1 km
- Mass: 8.10×10^{22} kg
- Terrain: barren
- Temperature: -210° / -73°C
- Escape Velocity: 2.91 km/sec

This small planet appears to be completely charred, with thick layers of carbides encrusting it's surface. Perhaps some cataclysmic event caused the planet to be scorched as it's atmosphere was burned off.
