

Planet Tordrale

Location: [Whyr](#)

- Diameter: 9456.4 km
- Mass: 4.434×10^{24} kg
- Terrain: Terrestrial
- Temperature: $-50/50^{\circ}$ C
- Escape Velocity: 8.36 km/sec

Tordrale shows an interesting effect on it's surface. It appears as this planet is currently terraformed as a network of basic plants growing all over the surface of the planet. Complex life does not exist here.
