

Babylon 5

One of the new features in Crossfire 2.0 is the possibility to create Clan Bases (only in Multiplayer mode). The [Dark Phoenix Clan](#) got the responsibility to provide its [Home System Sigma 17](#) to establish the first Test Station and to communicate all Problems with the Dev Team (SWAT OP-R8R and Huor). All other Clans, Galaxy Rangers and some other Players got access to it. Once the Testings were finished, Babylon 5 vanished and all Server Clans could start to build their own bases.

Edit by

All Testings were done. The Clan Base Plugin is active for all Clans now. Babylon 5 was deleted.
