

# Planet Stonrak

System: [Rhuntath](#)

DIAMETER: 8,972 km

MASS: 4.78 x10e24 kg

TERRAIN: Desert

TEMPERATURE: -70°C to 50°C

ESCAPE VELOCITY: 9.75 km/sec

Despite possessing a thin atmosphere, this planetoid is rendered uninhabitable by the choking, acrid dust that covers its surface -- in some places to a depth of several kilometers. All survey probes have either been swallowed by the dust oceans or ceased functioning shortly after planet'fall, presumably due to the nearly microscopic dust particles working their way into the delicate electronics.
