

Rum

Rum is a distilled beverage made from sugarcane by-products such as molasses and sugarcane juice by a process of fermentation and distillation. The distillate, a clear liquid, is then usually aged in oak and other barrels.

The majority of the world's [rum](#) production occurs in and around the Caribbean and in several Central American and South American countries, such as Guatemala, Colombia, Venezuela, Guyana and Brazil. There are also [rum](#) producers in places such as Australia, Fiji, the Philippines, India, Reunion Island, Mauritius, and elsewhere around the world. Light rums are commonly used in cocktails, whereas golden and dark rums are also appropriate for drinking straight, or for cooking. Premium rums are also available that are made to be consumed straight or with ice.

Rum plays a part in the culture of most islands of the West Indies, and has famous associations with the [Royal](#) Navy (See: Grog) and piracy (See: Bumby). Rum has also served as a popular medium of exchange that helped to promote slavery along with providing economic instigation for Australia's Rum Rebellion and the American Revolution.
