1. Description

The Hispania was one of the five colossal "Sleeper" colony ships sent by the [Western Alliance](#) to the [Sirius Sector](#). It was sabotaged, some say by [Eastern Coalition](#) agents, and half of its occupants used escape pods to abandon the ship, becoming the [Corsairs](#). The other half stayed and drifted with the ship, eventually founding a separate colony and becoming the [Outcasts](#). The remains of this ship can be found in the [Omicron Alpha](#) system, drifting in the vicinity of the Outcast capital world of [Planet Malta](#). It is also possible that the [nomads](#) attacked the colony ship but this is unlikely because the [nomads](#) were not in Sirius at the time. Hispania is possibly made up of any Spanish speaking nation.
