

Freeport-7

This Station was once built and owned by the [Zoners](#) and its existence was for a very long time just a myth. Many thought that this station is/was in the [Sigma-17](#) System, but in fact it was in similarly looking un-named System, located behind the outer ring of the Border Worlds, which was much later named the [Freeport 7](#). Station itself was completely destroyed by the [Nomads](#) attack.
