- System Info
- System Map

Majority of inhabitants of this System are refugees from Liberty and Rheinland Houses. This is reflected by the unruly behavior of people living here who are also very tolerant to space piracy and other criminal activities. A local safe "neutral zone" exists only in close proximity to the Freeport 2 station, which is controlled by the Zoners, and is connected by fast Trade Lane corridors to jump-gates leading to the Texas and Hamburg Systems. The rest of System is ruled by the radical Unioners operating from their Pacifica Base, which was built west of Freeport 2 in one of the big asteroids of the Tanner Belt which covers most of local space in Bering. In bars at Freeport 2, you hear rumours that the Unioners have found, and frequently use, unstable jump-holes to travel to other Systems.

1. Bases

- Freeport 2
