1. Description:

The "Eosander" is a ship that was unfortunate to be disabled by the strange and powerful power surge that went throughout the [Yakutsk](#) system. For some reason these ships have not been recovered since the time of the cataclysm, despite scans showing some equipment remaining on board and the lack of the escape pod. The cataclysmic surge may have been related to the Transdimensional Rift located in the system.

2. Content:

2x [Cataclysm Missile Launcher](#)
