California is a place where many very diverse activities take place, together with it being a primary trade route for Liberty to the Bretonia Region. In the beginning, it was here that the ongoing terramorfing of [Planet Los Angeles](#) commenced, and consequentially served for sometime as a luxury resort for the [Manhattan](#) upper-class. Later, terramorfing of [California Minor](#) commenced, together with the building of [Willard Research Station](#) which is now used by the [Liberty Navy](#) for military research. These activities naturally attracted the attention of many criminal organisations, which at the present time operate mostly from their [Alcatraz Depot](#) hidden deep in the Whitney Ice field. The [Liberty Navy](#) reacted by re-locating the [Battleship Yukon](#) here for support, which is now set for permanent guard duty. Her military presence is strong enough to protect travellers using all trade-lanes, except for the passage through the Tahoe Ice Cloud where it can be expected to encounter criminals attacks.

1. Bases & Dockable Planets

- [Alcatraz Depot](#)
- [Battleship Yukon](#)
