Colorado, in the past, was a dirty, industrial place which slowly changed with the expansion of Liberty's scientific base. Nowadays, on <u>Planet Denver</u>, numerous laboratories are used for the most recent scientific research, and the planet itself is also now a popular tourist center. Industrial production is still present, but on a much smaller scale. <u>Ageira Technologies</u> performs mining operations in the local asteroid fields which are rich in <u>Copper</u> and <u>Silver</u>. These mined commodities are processed at <u>Pueblo Station</u> which is, as a consequence, often attacked by local criminals who mostly belong to a <u>Xenos</u> group operating from a nearby asteroid base. Regular attacks were one of the main reasons why the <u>Liberty Navy</u> decided to assign <u>Battleship Rio Grande</u> into local space for permanent patrol duty.

1. Bases & Dockable Planets

- Battleship Rio Grande
- Ouray Base
- Planet Denver (Mooring Fixture)
- Pueblo Station

2. Unsettled Planets

- Planet Durango
- Planet Gunnison

3. Jump Holes

- Galileo
- Kepler
- New York
- Sea of Shadows

4. Jump Gates

- Galileo
- Kepler
- New York
