Dyson Sphere is a megastructure that completely encompasses a star (medium green in this case) and captures a large percentage of its power output. From the outside it looks like a huge planet. The [Nomads](#), or their masters the [Dom'Kavash](#), have built it for capturing the huge energy needs of the main [Nomad City](#) in the [Sirius Sector](#).

This very special place will be visited more than once during [Trent's](#) adventure and plays a vital role in saving the existence of the humans race.

1. Bases

- [Icarus Station](#) (*Exists only in late phase of the CF SP Campaign*)

2. Special
