This System has a strong [CSF](#) and [Outcasts](#) presence since their takeover of station [Outpost Epsilon](#). The station also serves as their Armory and is one of the best sources of equipment in the local area. Later arrivals here, the Rheinlanders, built two other stations which are oriented mainly towards mining operations in the local asteroid fields. It was exactly this kind of activity which revealed to the public two new connections to other Systems. It is worth noting that the [CSF](#) and especially the [Outcasts](#) were not happy by the public release of this information which resulted in numerous intense skirmish's against the Reinlanders around Quetzal and Saba Stations.
