The System El Riad plays a very important role for the [Coalition](#) logistics and many military and civilian convoys use the fast trade-lanes to reach [Aden Station](#), which serves as huge trading hub. In the past it was this station that was exclusively used by the military, but nowadays almost three quarters of the station is used by civilian services. Visitors who want to explore surrounding space should be however warned that safe travel can be expected only at entry and exit points to trade lanes which are guarded by numerous and heavily armed [Coalition](#) military patrols. Local asteroid fields and nebulas are often visited by pirates (mostly the local [Coalition Rogues](#)) and the latest security reports contain information about found wrecks which had marks of damage caused by big plasma weapons used by the [Dom'Kavash](#).
