Hokkaido is a place of constant fighting between Kusari government and the <u>Blood Dragons</u>, supported by the terrorist group <u>Golden Chrysanthemums</u> which have a small base here. For the outlaws in this System, there are two main targets: the automatic gas mining stations, which produce <u>H-Fuel</u>, a main export product for Kusari; the construction of a new Aegira's Jump Gate which should lead directly into the centre of the <u>Chugoku</u> system. The Gate is an attempt by <u>Kusari Naval Forces</u>, to bypass the <u>Blood Dragons</u> external defences and open a way for direct attack on Kyoto. Naturally, the <u>Blood Dragons</u> are doing everything to destroy its construction.

Lesser known is that <u>Golden Chrysanthemums</u> (a terrorist group consist of only women) are one of the best smuggling groups. Their base (know as <u>Ainu Depot</u>) is one of a few sources for the most expensive <u>BMG</u> commodity: the Station Blueprint, which can be found in all Sirius.

1. Bases

- Ainu Depot (Mooring Fixture)
- Battleship Matsumoto
- Chugoku Gate Construction Site
- Sapporo Station

2. Special

• Gas Miner (multiple in system)

3. Jump Holes

- Chugoku
- Kyushu
- Tohoku (only SP)

4. Jump Gates

New Tokyo

5. Wrecks

- Kusari Naval Forces Fighters
- James Morrell
