A very nice and important System (in the SP Campaign it plays one of the major roles) which offers connection between the Sirius and the Inner Core Sectors. Visitors however should be warned that the south-western part of the System needs special permission for entry. This restricted part has a lethal defensive capability, so one needs to visit local bars to find out information on how to obtain this permission before attempting to enter. This System also has a very rich MP history. In the past it was controlled by the [Silver Arrows](#) clan, which were for a long time mercenaries, and then, again for long time, police. But then they suddenly vanished and no one exactly knows what happened. But it is rumored that they were called for duty in the Inner Core, but nothing more. After the departure of the original owners, this strategic System was found by a clan known as the [Pretorian Guard](#), who's orientation seemed the very opposite to those of the previous owners.

1. Bases

- [Douglas Station](#)
- [Freeport 1](#)
- [Rugen Station](#)
- [Secret GMG Research Facility](#)

2. Unsettled Planets

- [Planet Spraque](#)

3. Special
