The Hyperion System was one of the new systems found after the discovery of the [X-3043](#) crossroad. Bretonian explorers who incorrectly thought they were the first to arrive, were unpleasantly surprised in seeing that armed weapon platforms had been placed around the orbit of [Planet Sylvin](#). Existence of the weapon platforms in orbit around an unimportant planet seemed at first senseless. There was even more confusion when further investigation revealed that they were built by the religious [Xenos](#) group. Were the [Xenos](#) the first to find this System? If so, when did they find it and why did they build such a defence system at all? Further survey of the System later revealed the real reason which surprised everyone. In Hyperion a way was found leading back to the "Home of Mankind"; back to the [Sol](#) System.
