- System Info
- System Map

Lost Paradise is a System with a very strong Nomadic presence. However it also supports a small settlement of Rheinland refugees. The settlement is located on the ELW (Earth-like-World) planet in the north-western part of the System. Interestingly, the settlers found, during earthworks, historical ruins which had a similar design to those examined on Planet Spraque in the Omega-3 System, which may have had some connection to the Dom'Kavash.

This small human settlement was lost for a long time and only revealed long after the battle with Nomads in X-3043.. It was found when a Rheinland patrol were pursuing a Nomads fighter wing through the green nebulae in the Omicron Alpha System and into the Unknown Systems. Latest information to reach Planet Crossfire indicates that the Nomads had started building new Nomad City in this hidden System. The decision as to what to do about it, has yet to be determined.

1. Bases

- Planet Lost Paradise *(unique planet with surface layer)*

2. Unsettled Planets & Moons

- Planet Nisrial

3. Special & Wrecks

- Deva Station

4. Jump Holes

- Unknown Jump Hole

Note: This special jump hole randomly goes to either [Unknown 1](#) or [Unknown 2](#) or [Unknown 3](#) systems.
