## 1. DESCRIPTION

The [CSF](#) group is the counter part to the [ASF](#) ([Alliance Star Fleet](#)) which stand against being united, having just a few authorities left to decide about good and evil of millions of inhabitants of Sirius and Altair. They fight for regional power to support each territorial advantage and not selling themselves short at the [ASF](#). [CSF](#) Leadership consists of a 'Federation Council' with military and civilian corporations representing separate star systems pooling resources, manpower and sharing bases. You regularly can witness fights in [X-3043](#) between [ASF](#) vs. [CSF](#) - Olympus vs. Proton battleships. Even the [CSF](#) does not have any official allies or enemies, the destroying of [CSF](#) vessels will negatively affect other unlawful acting factions. While the killing of other factions does not have any influence on the reputation toward [CSF](#). If you want to be part of the [CSF](#) ([Special ASF vs CSF Crossfire server Role-play](#)) mount on your ship their license and take part in fight against any opposing [ASF](#) pilot.
