[Diamonds](#) found in the Von Rohe Belt and deadly radiation emitting from the huge red dying star, are the key features of this System. The local population is only small, with most of them belongs or supportive of the extremely radical Rheinland faction, the [Red Hessians](#). These Rheinland outlaws had built their local hideout, the [Freital Base](#), inside one of the large asteroids in close proximity to the Von Rohe Belt. Once the [Freital Base](#) was built, the [Red Hessians](#) commenced mining the [diamonds](#) which represents their main source of income. However, in recent times, they have been in constant conflict with the [Daumann Heavy Construction](#) company, who also decided to expand here. [Daumann](#) built their [Solarius Station](#), which serves as a home for their miners and [bounty hunters](#) who protect them. Inside the Von Rohe Belt numerous destroyed ships belonging to both opposing parties can be found.
