This is the home System of the [Outcasts](#), who are known for trafficking the illegal drug [Cardamine](#). [Outcasts](#) arrived here on board the sleeper ship Hispania, whose wreck is still floating in space near Planet Mallorca. The local green nebula called the Siniestre Cloud serves not only as the burial ground for the [Outcasts](#), but is also a regular place for encountering the [Nomads](#). Normally only outlaws are to be found in this System, but a few brave independent explorers have reported that the green nebula hides several jump holes.

This nebula is also a place where a way was first found to the [X-3043](#) crossroad and where [The Order](#) started preparations for attacks on Nomad forces which controlled a strategically very important System at that time.
