- [System Map](#)

Omicron Beta is controlled by the [Outcasts](#). They expanded here from the [Omicron Alpha](#) System and had built here their forward operating base called Ruiz. This System is rich in [Alien Organisms](#), especially close to the Planet Elysium. The [Outcasts](#) allow access to independent miners for a fee, plus paying a hefty bribe for the privilege. Any unprepared vessel for heavy combat, and gets caught in this unauthorised area, will face the death sentence. [Outcasts](#) have proved their lethal force several time in the past and there is no sign that this will change in the near future.

1. Bases

- [Ruiz Base](#)

2. Unsettled Planets

- Planet Elysium

3. Jump Holes

- [Omicron Alpha](#)
- [Sigma-19](#)

4. Wrecks
