 - [System Map](#)

A large System located only two jumps from Liberty space and the [X-3043](#) crossroad. Dominating this System are five white suns surrounded by various differently coloured nebula clouds and asteroid fields. [Ice Palace](#), the first station in this System, was build inside one of the huge asteroids positioned close to a JH leading to the [Colorado](#) System. In recent times this station has serve as a refuel/rearm station for large Bretonian military ships. Much later, after the JH to the [X-3043](#) crossroad System was found, [Daumann Heavy Construction](#) started building a modern new station named [Freeport 11](#).

In local bars (MP only) rumours were heard about further building activities. Stories also circulated about numerous, heavily loaded trains (hidden IDs) which were making regularly entry either from [Daedalus](#) or [Colorado](#), vanishing somewhere in the local area and later reappearing empty as they left the System. Police clan [TSH](#) (The Steel Hearts) is calling the SoS System as theirs home and maybe these mysterious transports belongs to them ... but purpose is not publicly known.

1. Bases
