1. - DESCRIPTION

The Liberty Security Force ([LSF](#)) is the intelligence branch of the [Liberty Navy](#), operating in secrecy to ensure the free flow of goods and services in the Liberty economy.

2. - HISTORY

The Liberty Security Force keeps Liberty free from criminal activity and monitors illegal trades in contraband. They function as the intelligence branch of the Liberty Military, often operating in secret to ensure the free flow of goods and services within the Liberty economy. The [LSF](#) is so secret, in fact, that one rarely encounters them, although [LSF](#) officer Jun'ko Zane has been known to actively recruit freelancers to do the [LSF](#)'s dirty work. [LSF](#) personnel are widely respected in the Liberty Military, although there is no love lost between them and the [Liberty Navy](#), who both view themselves as the true vanguard of Liberty and who insist on letting the other group fully realize that fact whenever they have to work uncomfortably close on joint assignments. The [Liberty Police](#) seems to have no qualms taking orders from the [LSF](#). While the jurisdiction of these groups is fuzzy, the [LSF](#) does provide critical Intel to the Mission Commission allowing them to rank [LSF](#) sanctioned missions in terms of difficulty, giving the pilot a fair shot at whatever may be coming their way.
