System Sigma-17, an environmental attractive System, was always a stronghold of the [Bounty Hunters](#), which are in a permanent fight with criminals such as the [Corsairs](#) and [Outcasts](#) who come here from neighbouring Systems. Amongst the Hunters are the most feared and wealth those belonging to the [Dark Phoenix Clan](#), whose word here is unwritten law. In local bars there circulates a rumour that this clan was also able to secretly build their own station. Another rumour suggests that here was once a secret Zoner's base called [Freeport 7](#).
