The Crescent Cloud (a green asteroid field) in this System is a major source of [Alien Organisms](#) (AOs). OA's here can be mined in large quantities, including the so called mega-asteroids which offer up hundreds of units of OA's per asteroid. In local bars it is heard that a new connection to the [Enyo](#) system allows, on some days, the quick sale of all so hard mined AOs for a substantial profit.
