Inner Core Sector

Table Of Contents

This sector was, as were all other sectors in Milky Way Galaxy, ruled by the Dom'Kavash for a millennia. This changed when the Dom'Kavash decided to open three hypergates leading to distant galaxies, and the races living there. After an initial peaceful co-existence, the races living in the other galaxies decided to start a war because of greed. When humankind (living in the Sirius Sector) were able to create their own hypergate (in Omega-3 System) leading to the Inner Core Sector, they had their first opportunity to open negotiations with the Dom'Kavash.
