- [System Info](#)
- [System Map](#)

This System was first found and explored by [Junkers](#) operating from the [Beaumont Base](#) in [Texas](#). [Junkers](#) soon revealed that the Eskara Field in the rear part of this System offers mining opportunities and contains ore with crystallise [Artifacts](#) which are highly sought on all black markets in the whole of Sirius. Near to this field, a new unstable jump-hole was found, which led to an adjacent System (now known as [Midpoint Rift](#)) with green nebulae containing mineable ores with quickly dissolving [Alien Organisms](#) highly valued due to their use for speeding up terraforming processes. [Junkers](#) have decided to keep the existence of these two Systems to themselves and covertly built here fast trade-lane commuting between both local jump-holes.
