- System Map

This System was chosen by Four Houses for the building of a unique orbital industrial facility, which is many times bigger than the one located in New Berlin, having at its centre a planet with two moons. The main station here is the Pusin Dock operated by the Zoners faction. But there are also other docks controlled by other factions; for example the Junkers, Universal Shipping, Deep Space Engineering and others. All these factions were attracted here by the vision of huge profits and as a result a really impressive industrial facility was built. This however has led to a rise in crime rates to a such an unexpected level, that the Bretonian government decided to build a permanent police station, which is also part of the WoS industrial complex.

Many of the independent pilots likes this System because of its production of ships with unique design features, resultings in high traffic flow through the gate from the X-3043 System. In local bars rumours also circulate about the regular presence of The Order, which has its own interest here with special Cruisers being built and then disappearing. Order's ships do not use the Nomad Jump-Gate to the X-3043 System and it is therefore most likely that this System has other connections which are not known of publicly.

1. Bases

- Pusin Dock
- Mostar Dock
- Lagos Dock
- Tilsit Dock
- Venlo Dock
- Moers Dock
- Pharos Dock
- Rodgau Dock

2. Unsettled Planets & Moons

- Planet Death
    - Sniough *(moon)*
    - Itbel *(moon)*

3. Jump Holes

- Arena

- [Helios](#)

4. Jump Gates

- [X-3043](#)

5. Wrecks

- none
