## 1. Description

[Revelation Mine](#) Dropper: The [Revelation Mine](#) Dropper is the succeeding model of the Dual Mine Dropper. The previously separated explosive charges of the original mines are now put into two chambers of a single capsule, which will crack upon impact with the target. The resulting explosion is due to the higher compression rate and the close distances between the two chambers creating a more powerful explosion than with previous versions of this mine type. Dual Mine types are getting completely replaced by this new technology.
