

Gate/Trade Lane Parts

Jump Gate and Trade Lane Parts are exclusively manufactured at the [Ageira Technologies](#) facility in the [Colorado](#) system and are delivered to individual construction sites as necessary. These components are sealed in [scanner](#)-proof, tamper-proof white boxes that can only be opened with complex biometric keys. The boxes are also designed to detonate if opened outside of an authorized facility. Additional security measures are confidential, but [Ageira](#) has never failed to recover a missing white box.
