1. Info-Card

This Holoprojector creates low gravimetric impulses that can, in combination with a network of high energy lasers, form a holopulse that is extremely dangerous. Disadvantage of this technology is that it does use extremely high amounts of energy (functional only on ships with pulse drives). *Bremen, the German Class 1 Carrier, was commissioned in 2159 and used by the [Western Alliance](#) together with his sister-ship, 30-38 spacecrafts on-board, Regular fighter squadron - Vampires (commanded by the Klaus Steiner)*

2. Stats:

- Class: 8
- Shield Capacity: 0
- Regeneration Rate: 0
- Regen Power Drain: 1000
