## 1. Description

This research facility has been build by the [Gas Miners Guild](#) after [GMG](#) scouts have found a gravimetrical anomaly, in this system which had energy signatures similar to the scans of the [Dom'Kavash](#) Hypergate. [GMG](#) has taken careful security measurements to keep the position of this station secret. The Station itself regulates the energy flow to the new [GMG Hypergate](#) nearby while hundreds of scientists run their researches, with the task to find out how to control this technology.

*Note: Note: Location is protected with three Ion Cannons which could easily destroy your ship at distance 20 km. Before you decide go closer, is really good idea to search first a way how to made them friendly!*
