## 1. Description

[Stuttgart](#) is a green, almost inconceivably fertile world owing to the high concentration of carbon dioxide and [oxygen](#) in its atmosphere. While the [oxygen](#)-rich atmosphere made industrial development infeasible -- one stray spark could set off a massive conflagration -- farming has been hugely successful as many plants from [Earth](#) and elsewhere in Sirius took to the environment without problem. [Stuttgart](#) has since become the primary source of Food for the entire Rheinland nation. However, concessions granted to [Synth Foods](#) by the Rheinland government have allowed them to purchase many of the cooperatives and individually owned farms on the planet, spurring the creation of the [LWB](#) farmers rights group.
