1. Description

A harsh, rocky moon of narrow peaks and deep valleys once formed by volcanic upheavals that have long since stilled and grown cold. Whatever atmosphere may have once been present has evaporated into space over the millennia.

2. Stats

- DIAMETER: 6,472 km
- MASS: 3.19×10^{24} kg
- TERRAIN: Barren
- TEMPERATURE: -51°C to -38°C
- ESCAPE VELOCITY: 4.11 km/sec
- SYSTEM: [Stuttgart](#)
