1. Description

The [Shikoku](#) system was originally a gateway for almost all of the traffic originating from Liberty and the Independent Worlds. Entry requirements for the [New Tokyo](#) system were initially very strict, and as a result, [Shikoku](#) became home to a large band of itinerant foreigners. Deshima Station was constructed in 350 AS to house this population, and despite the significant relaxation of [New Tokyo](#) system entry requirements, it still serves as a way station. Over the years Deshima has been substantially improved through the addition of a [Synth Foods](#) biodome, the construction of additional living space, and a partnership with [Kishiro](#) to manufacture [Consumer Goods](#). The [Bounty Hunters Guild](#) also recently opened an office here as the large numbers of foreigners in the system includes a significant criminal element.
