1. Description

[Junyo](#) is almost entirely covered by a deep ocean that remains liquid across the planet's entire surface due to the young, hot [Shikoku](#) sun. While initially dismissed as infeasible for further development, the impending collapse of fisheries throughout Kusari in 630 AS motivated the government to begin terra forming the planet using recently discovered [Alien Organisms](#) in order to jump-start the nascent ecology. Within 50 years, the planetary environment had been sufficiently altered to begin wide-scale production of Luxury Foods under the administration of [Samura](#), a company that refuses to concede the market to the competing Liberty firm of [Synth Foods](#).
