1. Description

Rheinland geologists have determined that because this planet's core is unstable, it will likely break apart catastrophically some time over the next millenium, providing rich new mining fields

2. Stats

- DIAMETER: 5750.9 km
- MASS: 2.697 x10e24 kg
- TERRAIN: volcanic
- TEMPERATURE: 65°C/154°C
- ESCAPE VELOCITY: 5.09 km/sec
- SYSTEM: [Neophobos](#)
