1. Description

While Tau-31 was considered unfeasible for development by Bretonia Mining and Manufacturing (BMM), the smaller Independent Miners Guild (IMG) -- eager to exploit areas in which BMM feared to tread -- was quick to establish Holman Outpost to mine the large quantities of pure water and oxygen ice in the system. Water and Oxygen are then shipped to Planet Harris in partnership with Planetform Inc. . The IMG and Deep Space Engineering also use the station to supply their respective operations in the recently opened Tau-23 system.
