## 1. Description

Previously a barren world, Planet Harris was the object of one of the first large-scale terraforming efforts by [Planetform](#), Inc. . Initiated in 450 AS, the project was made easier by the abundance of pure [water](#) and [Oxygen](#) ice in the system, while [Terraforming Gases](#) were easily transported by [Bowex](#) from [Stokes Mining Station](#) in nearby [Leeds](#). Harris was originally scheduled for colonization in 820 AS, but the project has recently suffered a series of setbacks due to attacks by Gaian terrorists.
