1. Description

A system as rich in resources as <u>Tau-23</u> was ripe for exploration, and once surveyed by Bretonian Mining and Manufacturing in 730 AS, the construction of a Jump Gate network linking the system with Bretonia became a high priority. While work on the <u>Tau-31</u> Jump Gate has proceeded apace, the project has recently come under intense attack by the criminal organisation known as the <u>Outcasts</u>, though the reasons behind the hostilities remain unclear. <u>BMM</u> has been forced to hire extra security to protect the construction project and has even attempted to begin limited mining of the valuable <u>Beryllium</u> deposits in the system as a way to offset the skyrocketing costs.
